

Trim Filter

Cyclonic filter

Trim Filter features an innovative cyclonic filter system for the suction of the leaves. The aspirator with its **powerful 3 hp motor** sucks the leaves and preserves them in perfect conditions for subsequent use.

The radial cyclones of the cyclonic filter **can collect over 99% of the fresh or dry raw material** and then transfers them to a stainless steel tank.

During the process, Trim Filter keeps the **leaves and the dust in perfect conditions**, avoiding any possible filter obstruction and extending the useful life of the leaf collector.

Trim Filter is suitable for **food use**.

Zero maintenance

The cyclonic system prevents the leaves from coming into contact with the turbine, reducing the need for cleaning* and preventing surface wear.

* Cleaning consists of simple application of Master Clean over the whole surface.

Leaves in perfect condition

The cyclonic filter and air hose ensure perfect aspiration of the leaves without damage, allowing them to be used subsequently for extraction.

Simple and fast installation

The lightweight and compact design facilitates simple and fast installation: simply connect the hose to the trimmer and press the start button.

Technical data

Electrical connection	220/230 V 50/60 Hz single phase
Weight aspirator	98 kg
Aspirator size	103x60x202 cm
Size of pallet	85x130x115 cm
Air suction	2000 CFM
Noise	79 dB
Aspiration hose	Food certification
Aspiration hose	Polyurethane, PU plastic, steel wire spiral
Tank capacity	75 liters
Tank	Stainless steel 304
Tank Structure	Lacquered iron
Cyclonic filter	HDPE resin
Air-cooled motor	Yes
Warranty	5 years

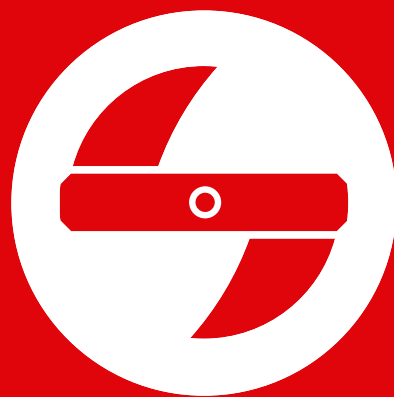

1 Cyclonic filter.
Abrasion resistant.

2 Tank.
Stainless steel 304.

3 Aspiration hose.
Food certification.

4 Air-cooled motor.
3 hp.
