

MS SEEDS 200

The All-in-One deseeder
for professional breeders

MS Seeds 200

The perfect solution to separate and clean cannabis seeds automatically.

We have developed a revolutionary machine to make breeders' work easier. The MS Seeds 200 is the first compact machine on the market specially engineered to separate and clean cannabis seeds in a fully automate process. And what is more... In one unique step.

Get seeds cleaned and sorted in perfect conditions, preserving all their properties intact and being ready to be replanted or used for medical purposes.

This functional deseeder features a revolutionary air-flow sorting mechanism that makes cleaning and deseeding procedures simple and effortless, with a high-rate production. In addition, cannabis flowers, leaves and branches free of seeds are gently separated and finely processed, turning them into high-grade seed-free biomass material.

Its compact size and easy performance allow a comfortable transport and functional use. With a tool-free system, you can assemble and disassemble it in a few seconds, and get a quick and practical cleaning and maintenance.

Main features.

- 180W motor power.
- Manufactured in stainless steel.
- Air-cooled gearmotor.
- Innovative flower deseeding system.
- Adjustable air flow regulator.
- Seeds container.
- Plant material container.
- Handle for an easy transport.
- No tools needed.

Adaptability and ease of use.

The MS Seeds 200 is engineered to simplify and automate the manual process of separating and cleaning the seeds. Thanks to its compact size and low noise emission level, you can take it anywhere you like and work wherever desired.

Easy to manage with one operator due to its practical and functional mode of use. Achieve automate impressive results, reduce labour cost and save time.

Use its handle for a comfortable transport and adapt any space into an authentic processing room.

INNOVATIVE DESEEDING SYSTEM

Seeds are gently treated, with minimal impact when proceeded.

AIR-FLOW MECHANISM

It separates and cleans cannabis seeds in high precision, with full adaptability to each seeds morphology.

CONTROL PANEL

With speed regulators to adjust both deseeding and cleaning systems as desired.

* Possibility to automate the loading process with our input belt Lift Conveyor.

2 in 1: Deseeding & cleaning with accurate results.

Cannabis breeders, we make it simple for you.

The MS Seeds 200 is the only machine on the market able to make 2 steps in 1: separate & clean cannabis seeds.

Just load the harvested dry cannabis flowers and the branches into the stainless steel hopper. Instantly, the separator system will sort both flowers and seeds and collect them specifically into the two different storage containers.

By adjusting the fan speed regulator, you will achieve optimal performance and get a 100% broken-free results percentage. Its cleaning mechanism gives a gentle treat and keeps intact all properties of the seeds processed.

The machine is manufactured entirely in high quality stainless steel, the perfect material to preserve and treat cannabis plant. Its capacity achieves up to 35 kg per hour, an equivalent of 30 operators.

2 PRODUCTS PROPERLY SEPARATED:

HOUR

** The outputs and equivalencies indicated on each machine have been tested by Master Products operators under optimum conditions for a good performance, and may vary according to the variety of the product to be treated, the environment, usage, maintenance and equipment settings.*

Assembly and disassembly in less than a minute WITH A TOOL-FREE SYSTEM

We know that a good maintenance is the key to keep your equipment in optimal conditions and extend its product shelf life.

Thanks to our tool-free system, you are able to assemble and disassemble the MS Seeds 200 in a matter of seconds, and clean it in an easy and comfortable way.

Innovative deseeding system.

To keep seeds pattern and properties intact.

Its genuine system for separating both seeds and plant biomass has been specifically engineered to maintain the structure and quality of the entire production. The nylon fingers minimise seeds impact while loading them, and guarantee the preservation of full seeds properties once separated from flowers and branches.

This first step, together with the gentle aspiration process, does not scratch the seeds pattern, keeping intact and in perfect conditions its full properties, being consistent and resistant.

The result are fertilised cannabis seeds properly cleaned and separated in optimal conditions. No breakage or crack damage. Even white seeds are removed from the final sorting.

100% integral seeds ready to be used or replanted.

Include the Trim Filter Cyclone and upgrade your deseeder experience.

Increase the automation and performance of the MS Seeds 200 including the Trim Filter vacuum solution to your equipment. Achieve maximum storage thanks to its large tank capacity. Simple installation and zero maintenance.

Technical Data

Electrical connection	230V 50/60Hz
Motor power	180 W
Machine weight	38 kg
Machine dimensions	42 x 58 x 95 cm
Machine material	Stainless steel
Deseeder system material	Food grade nylon
Adjustable air suction	Yes
Engine air cooler	Yes
Storage containers	2
Sound level	75 dB
Certifications	CE
Warranty	5 years

* Images are for reference only and may not match the current model.

* The warranty is for defects in parts and components, not for an inappropriate use of the machinery.
