

Beyond trimming automation

www.masterproducts.es

“We care about cannabis,,

We are living a revolutionary paradigm in the global cannabis market. The increasing rate of legalisation and acceptance of cannabis use in both adult-use and medicinal fields are the major important reasons driving the market's predicted exponential growth.

As an active leader, our goal is to provide premium solutions to completely automate and professionalise the entire cannabis postharvest process in the industrial & medical cannabis & hemp sectors.

We care about this emerging industry, we care about our clients, and, most importantly, we care about cannabis.

Arnau Juscafresa & Lluç Micaló
MASTER PRODUCTS CO-FOUNDERS

Business principles

At Master Products we design and manufacture high quality equipment for the postharvest processing of industrial hemp and medical cannabis. Our expertise and know-how make us a pioneering specialist company in the international cannabis sector, marketing our brand from Barcelona to the world.

We distribute to more than 40 countries worldwide and we keep on growing and moving forward to provide best cannabis trimmers and related solutions on the market.

With a 100% customer-focused orientation, our main strategic goals are summarised under three main concepts:

Quality in everything we do and how we do it

We provide finest quality throughout the entire production chain. As consequence, we manufacture best quality postharvest equipment which gives best quality treatment results in cannabis flowers.

Design innovative & functional

As an engineering company, we create advanced solutions in both products and manufacturing processes. Our primary objective is to provide customers with automated systems to improve and professionalise the production line.

Service on our customers, partners & distributors

Thanks to our free consultancy service & turnkey projects implementation, we help our customers not only on the production step, but on their global business setting up, achieving maximum benefits in processes optimisation.

More than a technical service, we are your team!

Master Products post-sales team and technical service is available 24/7 in different channels. Thanks to our large sales and international distribution network we guarantee imminent assistance and global support.

LiTE

Line

LiTE LINE

Introducing the new LiTE line, specifically designed to meet the needs of expanding growers in the cannabis sector. With a focus on ease of use, accessibility and basic functionality, our LiTE machines offer the quality and reliability you expect, now in a more compact and affordable format.

The new LiTE line is also distinguished by its modern, minimalist aesthetics. We want to offer small- and medium-scale producers a solution that, apart from being functional, it is also inspirational and motivating, providing a visually appealing and professional experience that can be integrated into any growing environment.

Simplify and optimise your post-harvest process with the reliability and efficiency that only LiTE can offer.

It's easy. It's functional. It's LiTE.

MT Dry 100 LiTE

The perfect trimmer for growers like you!

Precision and accessibility come together to offer endless possibilities in dry trimming cannabis flowers. It is ideal for small spaces, easy to transport and store thanks to its small size and weight.

Up to 1,8 Kg/h

- 120W motor.

MT Tumbler 200 LiTE

The most compact wet and dry trimmer

The MT Tumbler 200 LiTE trimmer machine combines affordability with exceptional engineering, making it the perfect choice for efficient and hassle-free trimming. Designed for convenience, all components that come into contact with flowers are easy to disassemble without the need for tools, ensuring quick cleaning and maintenance. Despite its budget-friendly price, its innovative design guarantees smooth operation, durability, and effortless upkeep, making it an excellent addition to any workflow.

- Made of Stainless Steel
- Flexible and adjustable stainless Steel blade for high precision cutting

PROFESSIONAL Line

PROFESSIONAL LINE

Discover our advanced postharvest solutions for processing industrial cannabis and hemp. Automate and industrialise the trimming process across all stages of production.

Made of premium material, our product range includes market-unique solutions like cannabis flower trimmers, buckers, sorters, deseeders, mills or extractor systems, all of them engineered and manufactured to meet our customers' needs and specific productions requirements. We also offer high-tech ultrasound cleaning systems to simplify and extend the overall maintenance of each equipment.

Process and treat cannabis and industrial hemp completely automatically by connecting different machines in series, creating professional production lines for maximum efficiency.

Available for both wet and dry trimming.

MT DRY RANGE

Best dry trimming solutions

Tools-free
Easy maintenance

Our MT Dry trimmers are specifically designed for trimming dry cannabis flowers. Their innovative cutting system, combined with the gentle movement of the barrel, protects the cannabis flowers, preserving their structure and integrity. Functional, efficient, and powerful. Discover our all of them and choose the one that best suits your needs!

PRODUCTION LINES

Automate your production to the max

We offer you complete solutions to automate 100% the entire cannabis production process. By joining different postharvest equipment, you will create complete fully automated production lines. Achieve greater profitability, reduce labour & operating costs and improve the quality of the final product.

In-line production systems

Join one, two or even three machines and achieve a real production line. A quick and easy way to set up a series production system that allows you to increase the final results.

Output conveyor belt

Allows convenient quality control

Input conveyor belt

Increases production by up to 30%

Thanks to the speed regulator, the rate of advance can be adapted, allowing the operator to identify damaged or untrimmed flowers.

Adjust the speed regulator as desired to maintain a constant and adequate product feeding according to the needs of each flower.

¿Do you trim WET or DRY?

No matter what's your choice!
Change the barrel in less than 1 min!

Trim wet or dry by simply changing the barrel and without using any tools. Both barrels are made of stainless steel to ensure maximum flowers preservation.

Wet barrel is included with your purchase. If you need the dry barrel or want both options, do not hesitate to contact us.

PLASMATIC V2.1

High-precision trichome separator

The PLASMATIC V2.1 is a cutting-edge solution powered by cold plasma technology, designed to refine cannabis with unmatched precision and deliver exceptional quality results. Static electricity is used to separate trichome heads from contaminants such as stalks and others, ensuring cannabis resin of the highest purity and quality. EU GMP compliant.

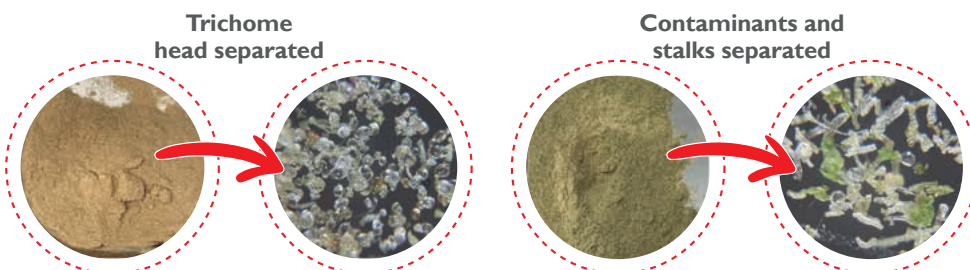

- Made of Stainless Steel.
- Advanced dust management system.
- Airflow sensor and regulator.
- Humidity and air temperature sensors.
- Integrated control panel.
- 4,3" LCD Touch-Screen.
- Advanced static discharge electrodes.
- Vibrating plates to prevent material clumping.
- Complete safety system.

Digital control panel for an easy use

MB Bucker 200 & 500

The easiest way to separate branches and stems from cannabis flowers

Discover our most advanced debudders on the market, designed to separate branches and stems from cannabis flowers with ease and comfort. Choose between our compact or larger solutions to suit the needs of your crop.

- Made of stainless steel.
- Speed control for major adaptation to flowers' variety and humidity.
- Selector with reverse direction to clear obstructions.
- Detachable stainless steel tray for the output and collection of the flowers.
- Stainless steel bearings and shaft, for a long service life.
- Air-cooled motor.
- Handles for a comfortable transport.
- MB Bucker 200 features 4 anti-vibration foot for optimal adaptation to the table.
- MB Bucker 500 features a flat surface designed to support the flower collection box.
- MB Bucker 500 features off-road and anti-puncture wheels for all-terrain use (or possibility to add a "swivel-wheel kit" for indoor mobility).

3 different heads included!

Ready to work with fresh and/or dry flowers. Choose and place the head according to each flower strain and level of humidity.

MX Ice 500 & 700

Advanced and powerful solventless ice extraction systems

Using a technology based on ice extraction and a process without chemical solvents, both MX ICE extractors isolate the glandular trichomes of cannabis to produce high quality resin, better known as "bubble hash" or "iceolator hash".

- Innovative solventless ice extraction system.
- 2 independent tanks (agitation and collection), completely insulated.
- Soaking screen to protect the product load.
- Safety Chamber to protect and preserve the trichomes.
- Digital control panel with 4.5" multifunction LCD touch screen.
- Customisable programme configuration and recording.
- Programmable speed regulator (from 30 to 75 RPM).
- Programmable water flow rotation system.
- Thermometer.
- 5 micrometric mesh filters included: 25, 73, 120, 160 and 220 µm.
- Recirculation pump included.
- Tilting system for easy loading and easy tilting maintenance.
- Swivel wheels for easy transport.
- Tool-free system.

MT Pocket / MT Standard 50 & 75

Simple and efficient

Say goodbye to the hassle of wet trimming! Our high-performance trimming machines make the process faster, easier, and more efficient than ever before. Designed for speed and precision, they quickly remove leaves with minimal effort, saving you valuable time and ensuring a clean, professional trim every time.

Compact and efficient trimmers

- 2 and 4 sharp blades respectively, all made of hardened steel.
- Made of stainless steel, without any kind of paint.
- Adjustable cutting height for high precision trim.
- Robust, with adjustable anti-vibration feet.
- Useful working area of 25, 45 and 70 cm, depending on the model.
- Adjustable stainless steel traction closures.
- Air-cooled motors.
