

# Beyond trimming automation

[www.masterproducts.es](http://www.masterproducts.es)

## “We care about cannabis,,

*We are living a revolutionary paradigm in the global cannabis market. The increasing rate of legalisation and acceptance of cannabis use in both adult-use and medicinal fields are the major important reasons driving the market's predicted exponential growth.*

*As an active leader, our goal is to provide premium solutions to completely automate and professionalise the entire cannabis postharvest process in the industrial & medical cannabis & hemp sectors.*

*We care about this emerging industry, we care about our clients, and, most importantly, we care about cannabis.*

**Arnau Juscafresa & Lluç Micaló**  
MASTER PRODUCTS CO-FOUNDERS

## Business principles

At Master Products we design and manufacture high quality equipment for the postharvest processing of industrial hemp and medical cannabis. Our expertise and know-how make us a pioneering specialist company in the international cannabis sector, marketing our brand from Barcelona to the world.

We distribute to more than 40 countries worldwide and we keep on growing and moving forward to provide best cannabis trimmers and related solutions on the market.

With a 100% customer-focused orientation, our main strategic goals are summarised under three main concepts:

## Quality in everything we do and how we do it

We provide finest quality throughout the entire production chain. As consequence, we manufacture best quality postharvest equipment which gives best quality treatment results in cannabis flowers.

## Design innovative & functional

As an engineering company, we create advanced solutions in both products and manufacturing processes. Our primary objective is to provide customers with automated systems to improve and professionalise the production line.

## Service on our customers, partners & distributors

Thanks to our free consultancy service & turnkey projects implementation, we help our customers not only on the production step, but on their global business setting up, achieving maximum benefits in processes optimisation.

## More than a technical service, we are your team!

Master Products post-sales team and technical service is available 24/7 in different channels. Thanks to our large sales and international distribution network we guarantee imminent assistance and global support.

# LiTE

## Line

## LiTE LINE

Introducing the new LiTE line, specifically designed to meet the needs of expanding growers in the cannabis sector. With a focus on ease of use, accessibility and basic functionality, our LiTE machines offer the quality and reliability you expect, now in a more compact and affordable format.

The new LiTE line is also distinguished by its modern, minimalist aesthetics. We want to offer small- and medium-scale producers a solution that, apart from being functional, it is also inspirational and motivating, providing a visually appealing and professional experience that can be integrated into any growing environment.

Simplify and optimise your post-harvest process with the reliability and efficiency that only LiTE can offer.

**It's easy. It's functional. It's LiTE.**

## MT Dry 100 LiTE

*The perfect trimmer for growers like you!*

Designed with the comfort and accessibility of all growers looking for an efficient and easy-to-use solution for dry trimming cannabis flowers.

Its compact and lightweight structure allows for easy transport and convenient storage, making it the perfect tool for small spaces.

### Up to 1,8 Kg/h

- 120W motor.
- 25cm diameter barrel.
- Speed regulator.
- Tensioner for blades.
- Protective front cover.
- Collection box.
- 360° vision.
- Tool-free system.

*Discover it!*

### Optional equipment

*Don't change machines, change drums!*

Turn your MT Dry 100 LiTE into a pollen extractor by replacing its original dry sifting drum with the extraction drum. 2-in-1 versatility! Choose the micron size of your screens according to your preferences and production needs and create your own Dry Sift quickly and easily.

- Hexagonal structure.
- Independent meshes.
- Easy and fast.
- Tool free.
- Various mesh micron options.

## MS Sorter 100 LiTE

*Sort your cannabis flowers by size*

Optimize your flower sorting process with the MS Sorter 100 LiTE. Designed for fast, accurate, and consistent flower sorting, accessible to everyone. Lightweight and easy to integrate into any space.

- Integrated and compact design.
- Manual operation.
- 4 sorting trays, made of food-grade polycarbonate material.
- Sorting grids of 20 mm, 13 mm, and 4 mm.
- Integrated cleaning system.

## MX Ice 200 LiTE

Solventless ice extraction system to make the perfect bubble hash

Automate and simplify the hash extraction process with our MX Ice 200 LiTE. Its cold extraction technology meticulously preserves the plant's delicate trichomes, ensuring a final product of exceptional purity and flavor.

 **4-6 Kg of fresh frozen material**

 **75L Capacity**

- Speed regulator.
- 2 tanks (agitation and collection) protected by insulated sleeves.
- Safety Chamber for trichome storage, made of stainless steel.
- Mechanical control panel.
- Timer.
- Interchangeable water flow rotation direction.
- Thermometer.
- Agitation tank support.
- Swivel wheels on the collection tank.
- Re-circulation pump (optional).
- 5 micron-filter bags included 25, 73, 120, 160 and 220 µm.
- Professional extraction within your reach.

## Scissors

Japanese Scissors for Trimming and Pruning

Crafted with the precision of Japanese craftsmanship, these scissors are designed to deliver clean, precise cuts, making them ideal for pruning and caring for your flowers. Their exceptional sharpness ensures smooth cuts that minimize damage to trichomes and plants, promoting healthy growth. With an ergonomic design and outstanding blade quality, they provide comfort and efficiency, even during extended tasks.

## MT Tumbler 200 LiTE

*The most compact wet and dry trimmer*

Designed for efficient, precise, and hassle-free trimming, this machine guarantees a flawless finish for both wet and dry cannabis flower trimming. All components that come into contact with the flowers are easy to disassemble without the need for tools, ensuring quick cleaning and maintenance.

With an affordable price, its innovative design ensures smooth operation, durability, and effortless maintenance, making it an excellent addition to any workflow.

- Made of stainless steel.
- Flexible and adjustable stainless steel blade for thigh precision cutting
- Hopper included for an easy product loading
- 150um micronmesh
- Tool-free system.
- Quick cleaning and maintenance.

## MB Bucker 200 LiTE

*The most compact debudder on the market*

The MB Bucker 200 LiTE is an affordable bucking machine, designed with small producers in mind. Its engineering allows for a fast and precise bucking process, minimizing flower handling and reducing the risk of damage. This machine guarantees durability, simplicity, and high performance in a compact design, adaptable to any flower variety and condition.

- Made of stainless steel.
- Speed control for major adaption to flowers strain and humidity.
- Reverse direction selector to clear obstructions.
- Stainless Steel bearings and shaft, for a long service life.
- Easy disassembly.

# PROFESSIONAL Line

## PROFESSIONAL LINE

Discover our advanced postharvest solutions for processing industrial cannabis and hemp. Automate and industrialise the trimming process across all stages of production.

Made of premium material, our product range includes market-unique solutions like cannabis flower trimmers, buckers, sorters, deseeders, mills or extractor systems, all of them engineered and manufactured to meet our customers' needs and specific productions requirements. We also offer high-tech ultrasound cleaning systems to simplify and extend the overall maintenance of each equipment.

Process and treat cannabis and industrial hemp completely automatically by connecting different machines in series, creating professional production lines for maximum efficiency.

**Available for both wet and dry trimming.**

## MT DRY RANGE

Best solutions for professional trimming

**Tools-free**  
**Easy maintenance**

Our MT Dry trimmers are specifically designed for trimming dry cannabis flowers. Their innovative cutting system, combined with the gentle movement of the barrel, protects the cannabis flowers, preserving their structure and integrity. Functional, efficient, and powerful. Discover our all of them and choose the one that best suits your needs!

# PRODUCTION LINES

*Automate your production to the max*

We offer you complete solutions to automate 100% the entire cannabis production process. By joining different postharvest equipment, you will create complete fully automated production lines. Achieve greater profitability, reduce labour & operating costs and improve the quality of the final product.

## In-line production systems

Join one, two or even three machines and achieve a real production line. A quick and easy way to set up a series production system that allows you to increase the final results.

### Output conveyor belt

*Allows convenient quality control*

Thanks to the speed regulator, the rate of advance can be adapted, allowing the operator to identify damaged or untrimmed flowers.

### Input conveyor belt

*Increases production by up to 30%*

Adjust the speed regulator as desired to maintain a constant and adequate product feeding according to the needs of each flower.

  
**+30%**  
PRODUCTION

## ¿Do you trim WET or DRY?

**No matter what's your choice!  
Change the barrel in less than 1 min!**

Trim wet or dry by simply changing the barrel and without using any tools. Both barrels are made of stainless steel to ensure maximum flowers preservation.

Wet barrel is included with your purchase. If you need the dry barrel or want both options, do not hesitate to contact us.

# PLASMASTATIC

High-precision trichome separator

The **PLASMASTATIC** equipment is a high-quality, electrostatic technology-powered solution designed to refine cannabis with unmatched precision in cannabis Dry Sift. It uses static electricity to separate trichome heads from plant material and even from trichome stalks, ensuring maximum purity and quality of cannabis resin.

## PLASMASTATIC V2

- Made of Stainless Steel.
- Advanced dust management system.
- Airflow sensor and regulator.
- Humidity and air temperature sensors.
- Integrated control panel.
- 4,3" LCD Touch-Screen.
- Advanced static discharge electrodes.
- Vibrating plates to prevent material clumping.
- Complete safety system.

## MX Ice 500 & 700

Advanced and powerful solventless ice extraction systems

Using a technology based on ice extraction and a process without chemical solvents, both **MX ICE** extractors isolate the glandular trichomes of cannabis to produce high quality resin, better known as “bubble hash” or “iceolator hash”.

- Innovative solventless ice extraction system.
- 2 independent tanks (agitation and collection), completely insulated.
- Soaking screen to protect the product load.
- Safety Chamber to protect and preserve the trichomes.
- Digital control panel with 4.5” multifunction LCD touch screen.
- Customisable programme configuration and recording.
- Programmable speed regulator (from 30 to 75 RPM).
- Programmable water flow rotation system.
- Thermometer.
- 5 micrometric mesh filters included: 25, 73, 120, 160 and 220 µm.
- Recirculation pump included.
- Tilting system for easy loading and easy tilting maintenance.
- Swivel wheels for easy transport.
- Tool-free system.

## LIO Freeze Dryer

Ensure your high-quality bubble hash

The Exeat **LIO** freeze dryer uses the process of sublimation to remove moisture from the cannabis flower and/or bubble hash. Thanks to this technique, terpenes and cannabinoids are better preserved and oxidation is avoided.

- Available in different standard sizes.
- Spare parts available.
- Automatic and manual control.
- Plug & play connection, all-in-one.
- Oil pump or oil-free options available.
- Temperature precision.
- Pre-saved recipes both for bubble hash drying and flower drying.
- CE certification.

## MT Pocket / MT Standard 50 & 75

*Simple and efficient*

**Say goodbye to the hassle of wet trimming! Our high-performance trimming machines make the process faster, easier, and more efficient than ever before. Designed for speed and precision, they quickly remove leaves with minimal effort, saving you valuable time and ensuring a clean, professional trim every time.**

### Compact and efficient trimmers

- 2 and 4 sharp blades respectively, all made of hardened steel.
- Made of stainless steel, without any kind of paint.
- Adjustable cutting height for high precision trim.
- Robust, with adjustable anti-vibration feet.
- Useful working area of 25, 45 and 70 cm, depending on the model.
- Adjustable stainless steel traction closures.
- Air-cooled motors.

### Adapt to the size of your flowers

Increase productivity with up to 4 operators working simultaneously on the MT Standard.
