**THE ULTIMATE EXPERIENCE  
BACKED BY TOP TECHNOLOGY**

# Bagg-Er

## Bagging system with a versatile infeed for multiple different production insertion.

The equipment is an all-in-one solution, it opens the bags, fills and seals them. It allows the operator to see the entire filling process from the front of the machine during operation.

Another feature is all the mechanics are located the back of the machine and the bag filling assembly is in the front. This ensures that the product will never be in contact with mechanical parts for an easy cleaning.

The Bagg-Er comes with a cleated conveyor for an easy insertion of one or multiple (up to 10) pre-rolls in a bag.

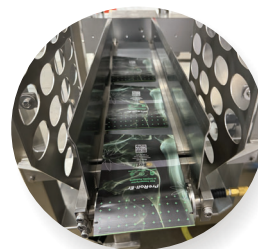

The machine is adaptable to all sizes of pre-rolls and bags.

Various Bags Sizes

Vaccum Opening Sensor

User Friendly Operation

Easy  
Cleaning

Single or  
Multipack

All sizes  
of pre-rolls

**FROM START TO FINISH PRODUCTION.**

## Highlights

Production capacity: up to 25 ppm	Bag Magazine with high autonomy
Low maintenance / User friendly	Cleated conveyor for pre-rolls insertion
Sturdy construction	Food grade aluminium and 304 stainless steel
Easy adjustment for pouch width	Vaccum opening sensor to avoid misfill
Bag feeding, opening, filling and sealing	Made with 304 stainless steel
Funnel insertion system	Single or multipack

## Technical Details

Electrical: 208-240 VAC / 3A / 1 PH
Air: 90 PSI / 5 CFM
Small footprint: 61"L x 54"w x 58"h
HMI & PLC Omron / North American manufacturer
