

MASTER SONIC 500 MED

ULTRASONIC CLEANING SYSTEM

The **MASTER SONIC 500 MED** cleans post-harvest equipment with the push of a button, delivering total cleaning in just 5 minutes.

Safe, efficient, and repeatable. It adapts seamlessly to different components and production schedules.

EU GMP compliant.

Sizes
 **100%**
customizable to
your needs.

- 7" HDMI touch screen.
- Side-sweep oil separation system
- Pneumatic lifting platform (320 kg capacity).
- Temperature selection from 0°C to 80°C.
- Automatic start programming.
- Compressed air gun included.
- Built in 304 & 316 stainless steel.
- 40 KHz frequency
- IQ & OQ documentation available.

CLEANING IN ONE TOUCH.

Deep, effective ultrasonic cleaning removes resin and contaminants using only hot water and ultrasound, that's it. No harsh chemicals. No scrubbing. Just clean, GMP-ready components in minutes.

Technical data

Electrical connection	230V, 50Hz
Ultrasonic power	4,500 W
Heating power	7,500 W
Material	Stainless steel
Weight	320 kg

LARGE CAPACITY

Don't let the compact size fool you. The Master Sonic 500 has a large interior capacity, room enough for the MT Tumbler 500 barrel and other oversized components.
