

MT DRY 800

PRECISION CANNABIS DRY TRIMMER

The **MT DRY 800** processes dry cannabis flowers with gentle, consistent trimming that preserves trichomes, terpenes and cannabinoids.

Designed for large-scale growers looking for high production rates with high-quality final results.

- 48 cm Ø & 142 cm in length barrel.
- Automatic blade tensioner.
- 3-speed regulator.
- LED light system.
- Full safety system + emergency stop.
- Protective front cover.
- 2 removable collection boxes.
- No-tool system.

POWERFUL, VERSATILE & HIGH-CAPACITY.

Technical data

Electrical connection	230 V / 50 Hz
Barrel motor	550 W
Material	Stainless steel
Tilt	25°
Decibels	70 dB
Weight	200 kg
Dimensions	142 x 70 x 154 cm

Quick cleaning. No tools required.

The MT Dry 800 is designed to minimize cleaning downtime. Remove the motor and electrical components without any tools, then take out the barrel in seconds. Clean the entire structure and get back to production, fast.

**Less cleaning time.
More processing time.**

Optional
puncture-proff
all-terrain wheels

TURN IT INTO A DRY SIFT EXTRACTION SYSTEM.

Don't change the machine,
change the barrel.

With the 120-micron stainless steel mesh barrel, the MT Dry 200 becomes a high-capacity pollen extractor. Same versatility, now with more volume per cycle.

Its hexagonal structure with independent mesh panels allows you to easily replace each one in case of damage, while also providing a rotation movement that ensures flowers hit with just the right force: maximum trichome extraction without damaging the material.

**Different micron options a
vailable depending on your
preferences and production
needs!**
