

MX ICE 200

LiTE

SOLVENTLESS ICE EXTRACTION

The **MX ICE 200 LiTE** isolates cannabis glandular trichomes using water, ice, and movement. The result is a high-purity bubble hash that preserves terpenes and cannabinoids.

The most advanced solventless ice extraction.

- 2 independent insulated tanks.
- Mechanical control panel.
- 5 micron mesh filters included (25, 73, 120, 160, 220 μm).
- Speed regulator.
- Interchangeable water flow rotation direction.
- No-tool disassembly.

UP TO **4-6 kg**
fresh frozen material

75_L
CAPACITY

MAXIMUM PERFORMANCE & EASE OF USE.

The MX ICE 200 LiTE features intuitive analog controls for speed, water flow direction, and extraction timer. Set it. Forget it. Consistent results with every batch.

Technical data

Electrical connection	230V, 50Hz
Barrel motor	120 W
Material	Stainless steel
Decibels	60 dB
Weight	80 kg
Agitation tank	72 x 72 x 122 cm
Collection tank	50 x 50 x 55 cm
Tanks diameter	50 cm Ø

Quick cleaning. No tools required.

Keeping your equipment in top condition has never been easier. The MX ICE 200 LiTE allows quick, hassle-free disassembly, making cleaning after each use simple.
