

MS SEEDS 500

CANNABIS DESEEDER & CLEANER

The **MS SEEDS 500** separates cannabis seeds from flowers and leaves, keeping their structure and natural properties completely intact.

The most advanced deseeding system.

- Adjustable airflow and suction.
- Independent collectors for seeds and plant material.
- Air cooled motors.
- Separates seeds into 2 sizes.
- Complete disassembly for water pressure cleaning.

kg/h

CLEAN, INTACT & READY

Stop removing seeds by hand. The MS Seeds 500 automates the entire process, separating seeds from flowers, cleaning both, and sizing the seeds.

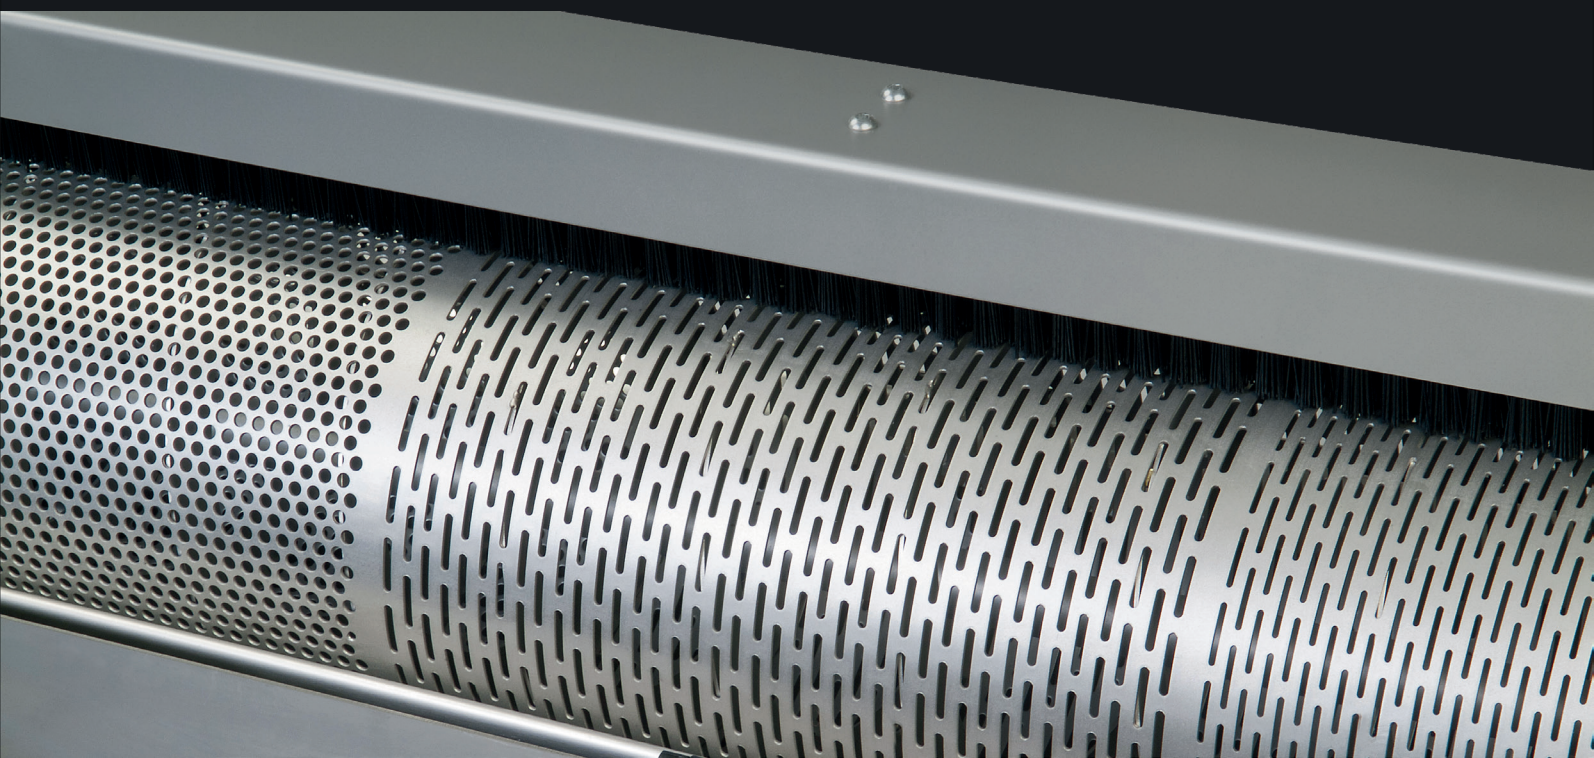

Technical data

Electrical connection	230V, 50Hz
Motor	310 W
Suction motor	450 W
Material	Stainless steel
Decibels	75 dB
Weight	80 kg
Dimensions	140 x 75 x 123 cm

Extraction-ready, every time.

The flowers are treated gently during the whole cycle at MS Seeds 500, they are perfectly stored in the cyclone filters and kept with a diameter of 4 to 6 mm, totally cleaned and crushed for their use in replanting and/or extraction.

At the end of the production line, the seeds are stored in the two containers separated by size, clean and ready for use.

HOW IT WORKS

Where do the seeds go?

At the end of the production line, the seeds are separated into two trays where they are separated by size. They are clean and ready to use.

The MS Seeds 500 mechanisms enable the grains to retain their physical qualities and properties.

- 1**  Cleaning of the remaining material
- 2**  Small seeds
- 3**  Large seeds
- 4**  Large plant material
