

MTT MED 500

OUTPUT CONVEYOR BELT

COMPLETE THE PRODUCTION LINE

Output conveyor belts are designed to automate the final step of the trimming process, transporting cannabis flowers from the trimmers output to the sorting or packaging areas.

- Manufactured in stainless steel.
- Speed regulator included.
- Adjustable height.
- Swivel wheels for easy transportation.
- Easy cleaning and maintenance.

**Critical parts
100% removable
without tools**

FULL AUTOMATED OUTPUT PROCESS

Use the output conveyor belt as a quality control table, allowing the operator to double check flower results and improve final production.

Just continuous, efficient production.

Technical data

Electrical connection	230V, 50Hz
Motor	25 W
Machine material	Stainless Steel
Belt material	FDA food-grade nylon
Weight	29 kg
